

# Allen Reinoso

📍 Toronto, ON    ✉ allen.j.reinoso@gmail.com    ☎ 647-335-1452    in allen-reinoso    🌐 Allenreinoso28

## Skills Summary

---

**Programming Languages:** Python, Javascript, Java, SQL, C/C++

**Frameworks/Tools:** Git, Github, React, Docker, Bash, HTML, CSS, Node.js, Next.js, MongoDB

**Development Skills:** Data Structures and Algorithms, RestAPI, Agile

**Interpersonal Skills:** Communication, Team Collaboration, Problem-Solving, Project Managment

## Education

---

**Toronto Metropolitan University** (Formerly Ryerson University)

**Toronto, ON**

*Computer Science (B.Sc Hons Co-op)*

*Sept 2023 – Expected 2027*

◦ **CGPA:** 3.85/4.33

◦ **Relevant Courses:** Software Engineering, Data Strutures and Algorithms, AI/ML, Discrete Math, Database Systems

## Experience

---

**Lead Web Developer**

**Toronto, ON**

*Toronto MetRobotics* [🔗](#)

*Sept 2024 – Present*

- **Technologies:** Javascript, **ROS2**, TypeScript, Tailwind, **React**, GitHub, shadcn
- Leading the **Web Development** team's **Agile** development environment, participating in sprint planning, stand-up meetings, and code reviews, **iteratively refining** features and **improving system performance**.
- **Developed** a dynamic **React-based GUI** with reusable components to display **live rover data** and implement **ROS2 data distrubution services**, enhancing user control and system monitoring.

**Team Lead & Crew Trainer**

**Scarborough, ON**

*McDonald's*

*Sept 2020 – Present*

- **Onboarded** and **coached** new staff in guest service and kitchen operations; **monitored** performance and provided feedback to uphold **quality standards**.

## Projects

---

**Algorithm Visualizer Site** [🔗](#) — React, JavaScript, HTML, Tailwind CSS, GitHub

**Apr 2025**

- **Led** a small development team in the design and launch of **AlgoBuddy** [🔗](#), a web-based algorithm visualizer, ensuring a user-friendly platform that improved accessibility to complex algorithms.
- **Implemented 8 algorithms** and **3 custom visualizers** in React, JavaScript, HTML/CSS and D3.js, enhancing scalability and enabling interactive demonstrations for deeper algorithm comprehension.

**Budget Expense Tracker** [🔗](#) — Python, SQLite3, Flask, HTML, JavaScript, CSS

**Aug 2024**

- **Developed** a full-stack web application to help users track income and expenses efficiently. Utilized Flask with Python for backend processes and SQLite3 for database management, enabling persistent and reliable financial data storage.
- Enhanced the front-end using HTML, CSS, and JavaScript to optimize user experience, resulting in a clean, responsive interface. The application achieved top marks in Lighthouse tests, consistently scoring an **average of 90+**.

**LeetNGreet App** [🔗](#) — React, Auth0, Docker, MongoDB, Next.js, TypeScript

**In-Progress**

- **Building** a full-stack web application to connect LeetCode users, using Next.js for the React frontend, REST API endpoints, and MongoDB with Mongoose for user information and post storage.
- **Implemented authentication and authorization** with Auth0, enabling personalized sessions and protecting user data.
- **Containerized** the application with Docker to ensure consistent development and deployment environments across systems.
