Toronto, ON | [allen.j.reinoso@gmail.com](mailto:allen.j.reinoso@gmail.com) | 647-335-1452 | [allenreinoso.com](http://allenreinoso.com) | [linkedin/allen-reinoso](https://www.linkedin.com/in/allen-reinoso) | [github/Allenreinoso28](https://github.com/Allenreinoso28)

## Professional Summary

---

Computer Science co-op student with hands-on experience contributing to real-world software projects in collaborative, cross-functional environments. Skilled in full-stack development, data-driven applications, and applying academic knowledge to practical work. Known for strong communication, adaptability to new tools and technologies, and ownership of assigned responsibilities while delivering high-quality results.

## Technical Skills

---

**Languages:** Python, JavaScript, Java, SQL, C, C++

**Frameworks & Libraries:** React, Next.js, Node.js, Flask, D3.js

**Tools & Technologies:** Docker, Git, GitHub, MongoDB, SQLite, Tailwind CSS, Auth0

**Concepts:** Data Structures, Algorithms, REST APIs, Agile, Full-Stack Development, Object-Oriented Programming, Software Development Life Cycle (SDLC)

## Education

---

**Toronto Metropolitan University** (Formerly Ryerson University)

Bachelor of Science (Honours), Computer Science — Co-op

Toronto, ON

Sept 2023 – Expected 2028

- Cumulative GPA(CGPA): 3.81 / 4.33 (Dean's List equivalent)
- Relevant Coursework: Data Structures and Algorithms, Software Development, Database Systems, Artificial Intelligence, Computer Security

## Professional Experience

---

**Web Development Lead** — Toronto MetRobotics

Toronto, ON

Sept 2024 – Present

- Contributed to real-world engineering projects by developing and maintaining a web-based dashboard supporting robotics operations and decision-making.
- Collaborated with cross-functional hardware and software teams to define requirements, align deliverables, and support operational goals.
- Designed and implemented a React-based interface to visualize live telemetry data transmitted via ROS2, enabling real-time monitoring and analysis.
- Took ownership of delegated responsibilities, from feature planning to deployment, ensuring reliable and high-quality results.
- Mentored junior developers and communicated technical concepts clearly, strengthening team knowledge sharing and code quality.

**Team Lead & Crew Trainer** — McDonald's

Scarborough, ON

Sept 2020 – Present

- Supported day-to-day operations by training and mentoring 15+ employees, ensuring adherence to procedures, quality standards, and workplace integrity.
- Communicated effectively with team members and management to coordinate tasks, resolve issues, and maintain smooth operations in a fast-paced environment.

## Technical Projects

---

**Algorithm Visualizer Web Application (AlgoBuddy)**

Technologies: React, JavaScript, HTML, Tailwind CSS, D3.js | Live Site | GitRepo

Apr 2025

- Designed and built a React-based algorithm visualization platform to support interactive learning of core computer science concepts.
- Implemented 8 algorithms and 3 custom visualizers with animated step-by-step execution using D3.js.

**Budget Expense Tracker**

Technologies: Python, Flask, SQLite, HTML, CSS, JavaScript | GitRepo

Aug 2024

- Developed a full-stack web application enabling users to track income and expenses with persistent data storage.
- Achieved an average Lighthouse performance score of 90+ through frontend optimization and responsive design improvements.
