**Re: Application for Software Engineering Intern Co-op Position**

Dear Hiring Manager,

I am a third-year Computer Science student in the Co-op program at Toronto Metropolitan University, maintaining a 3.85/4.33 GPA. I am excited to apply for the Software Engineering Intern Co-op position at Block, Inc.. With hands-on experience developing user-focused financial web applications, real-time systems, and scalable TypeScript development, I am eager to contribute my technical, analytical, and collaborative skills to your team.

As the Lead Web Developer for TMU's robotics team, I developed a React-based dashboard to visualize real-time rover data, to enhance performance during the University Rover Challenge. This experience strengthened my understanding of scalable UI design, modular development, and agile collaboration within a multidisciplinary team.

I am also passionate about creating technology that supports better financial decision-making. In a personal project, I designed and developed a budgeting and expense tracking web application that enables users to easily visualize spending habits and maintain transactional accuracy. Crafting this interface taught me how trust, clarity, and usability shape user confidence in financial tools. This experience directly motivates me to contribute to Block's mission of expanding economic access through intuitive and reliable financial technology.

I am particularly drawn to Block, Inc. because of its commitment to advancing economic empowerment and financial accessibility worldwide. I am inspired by your focus on building technology that empowers people and businesses to participate in a more inclusive global economy, and I am eager to apply my skills to support your ongoing projects while continuing to grow as a Software Engineering Intern within your organization.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to Block, Inc.'s success.

Sincerely,

Allen Reinoso (He/Him)  
Third-Year B.Sc. (Hons Co-op) Computer Science Candidate  
Toronto Metropolitan University
